User Story	To Do	In Progress	Completed
As a collector, I want to be able to easily filter my searches for art so that I can view only the art that is relevant to my tastes and budget	- Implement the ability to filter art based on search criteria		
As a user, I want to be able to use a web app with cohesive styling and no bugs, so that I can find the art I want without the app crashing or looking unappealing	- Finish up the cohesive UI - Fix bug in register user to allow for a field specifying the role of the user - implement the validation for all forms - implement deleting art from the front end - create an error component - implement uploading photo and description for profile page
